CANALS AND WATER DITCHES.

In addition to those enumerated in the following table, there are numerous irrigating ditches and several important works now being constructed. The Humboldt Canal will, when completed, furnish power for a large number of mills, and sufficient water to irrigate the agricultural districts in its immediate vicinity, and the Summit Lake and Virginia Aqueduct Co., with a capital of \$2,000,000, propose conveying the waters of Summit Lake a distance of thirty miles, supplying the cities of Carson, Silver City, Gold Hill, and Virginia City with an abundance of water for mining, agricultural, and municipal purposes.

TABLE OF CANALS AND WATER DITCHES.

For Mining Purposes in the State, with the Location, Source of Water, Length, Cost, etc., of each.

AGRICULTURAL.

LAND.—The amount of land in the counties of Churchill, Humboldt, Lander and Nye, adapted to agricultural and grazing purposes, is 227,000 acres. Under cultivation in Humboldt, Lander, Lyon, Nye and Washoe, nearly 22,000 acres. "Many millions of acres of land in this State now comparatively worthless, would be valuable if irrigated, and several hundred thousand acres of swamp and overflowed land might be reclaimed by a proper system of drainage."

in abundance in several counties. In Douglas, Humboldt and Nye counties good crops have been raised, the wheat averaging thirty bushels and barley forty bushels per acre. The amount of hay cut in 1865 is estimated at 100,000 tons. A sufficient amount of vegetables is raised for home consumption, and the potato crop has been more than the average yield in other States, and of an excellent quality.

PRODUCTS.—The different cereals are produced

Live Stock, 1865.—Horses, 3,900; Mules, 650; Cattle, 10,650; Sheep, 5,600; Swine, 750.
