

STOP AND FIGURE

how much you have paid out for rented furniture during your married life. Conservatively, it will be about \$15.00 a month, \$180.00 a year. Or, if you've rented furnished apartments for ten years you've literally thrown away \$1,800.00—quite a sum, isn't it, which could have been to your credit at the bank, had you purchased furniture on the installment plan.

Come in and select what you want, tell the man to charge it, and the payments can be made to suit your pocket-book.
