

Hose Water Meter

¶ A modern device of inestimable value to owners of small irrigation plants, stock farms, gardens and lawns. Patent gauge valve of simple construction easily adjusted for any quantity of water from one to thousands of gallons. Set the meter, turn on water and the automatic valve does the rest. Use the Globe Hose Meter and avoid empty or leaking tanks and large water bills.

Sprinklers

¶ A rare combination of beauty and economic efficiency is produced in the Globe Lawn Sprinkler, which issues a beautiful rain-like spray differing in form according to desire, by design in perforation of tops. By patent method the Globe Sprinkler controls the water distribution by covering round, square, oblong or odd shape beds and lawns without loss of water. Sprinkling area from 20 to 50 feet, according to pressure.

The Globe Sink Flusher

¶ An invaluable, high-grade kitchen utensil, guaranteed to open clogged-up sinks by direct pressure from hot-water tank, made of high-grade white rubber tubing and polished brass. A special feature of value is to unscrew tube coupling, place small cork in disk, put disk over sink drain and your sink becomes a large, handy rinsing-tub or dish-pan. *Write for special offer.*

The Globe Floating Ball

¶ Cylindrical in shape, increasing working space in tanks or reservoir, with special patent connecting hinge joint in center of cylinder, producing greatest efficiency at point of resistance. Once tried, you will use no other. Solid copper standard thread connection.
