No Reference Library of today is complete without a set of Bancroft's Historical Works. Whatever other books are to be found in a library worthy of the name, there must be a fair presentation of the World's History, and no History of the World can be called complete without Bancroft's Histories, the information contained in which nowhere else exists. These Histories stand as the best authorities in print on the sections treated.

Among the many libraries which have purchased sets for reference are:

Astor Library
Chicago Public Library
University of Pennsylvania
University Club of New York
Vanderbilt University
Parliament Library, Canada
Johns Hopkins University
Marquis of Lansdowne
Cardinal Gibbons
Columbia College
Century Association
Brown University
University of Toronto, Etc.

Though costing over \$600,000.00 and 20 years of labor, the volumes are within easy reach of all. They are sold either separately or in sets at \$4.50 each volume.
