What Constitutes Good Laundry Work?

A Polish is obtained by friction and pressure which forms a hard, brittle surface, causing goods to break. Whiteness can be obtained by a severe process of bleaching, which destroys the fibre in linen.

Good Laundry Work Combines Whiteness, Cleanliness, Soft Finish and Elasticity, all of which is obtained without severe process of handling.

**Surely
Not
Just a
High
Polish
and
Whiteness**

We Guarantee Goods to Last Longer by Our Process

All Silks and Woolens are washed by hand
We pay for all losses or damages where claims are properly made
We ask a portion of your patronage

Respectfully
White Star Laundry Company
