

SPARKLING

INVIGORATING

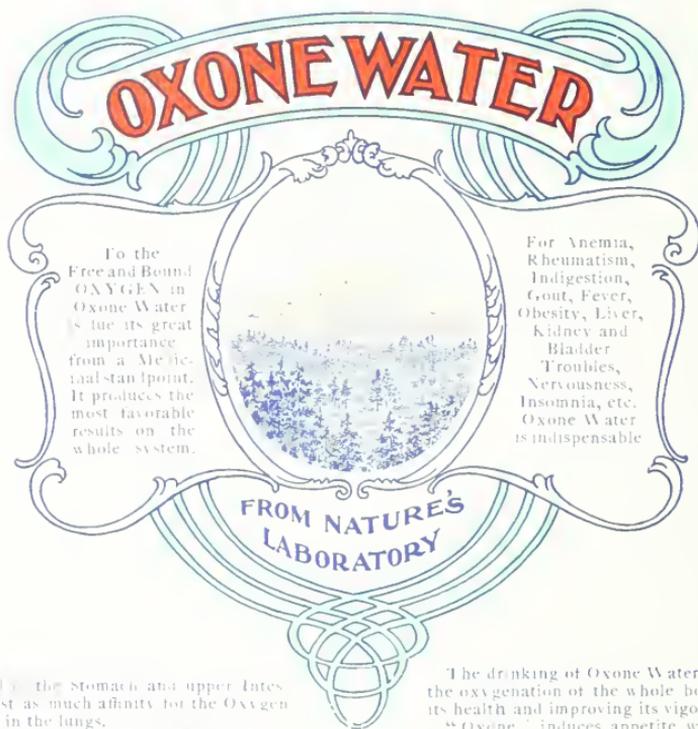

OXYGEN

IS THE MOST IMPORTANT ELEMENT OF

LIFE

OXONE WATER

CONTAINS 6 TO 8 VOLUMES FREE AND BOUND OXYGEN

For the
Free and Bound
OXYGEN in
Oxone Water
is due its great
importance
from a Medical
standpoint.
It produces the
most favorable
results on the
whole system.

For Anemia,
Rheumatism,
Indigestion,
Gout, Fever,
Obesity, Liver,
Kidney and
Bladder
Troubles,
Nervousness,
Insomnia, etc.
Oxone Water
is indispensable

The blood of the Stomach and upper Intestines has just as much affinity for the Oxygen as the blood in the lungs.

Oxone Water, which contains a large amount of free Oxygen, affects the oxidation of this intestinal blood, and the tissues fed by it in a more perfect manner than could be possible in any other way.

The drinking of Oxone Water contributes to the oxygenation of the whole body, increasing its health and improving its vigor.

"Oxone" induces appetite when taken before, and aids digestion when taken during meals.

It is palatable as a table water, having the vim and sparkle without the bite of other mineral waters.

**The Oxone Spring is Located at the Base of Mt. Shasta
near the Main Line of the S. P. R. R.**
