

H. JEROME FOSSELLI.  
SCIENTIFIC PALMIST.

Palmistry, properly understood, is a profound science, not to be classed with or understood as Fortune Telling.

The hand not only shows the character and ability of the individual, but gives also a detailed account of all that has transpired, and of all that will transpire, in the life.

To interpret the hand thus, and to be of real service to my Clientele, is my life work.

The education of children along lines suited to temperament and ability is of the greatest importance. In this matter I am deeply interested, and parents will find my readings invaluable as a guide to direct the life and work of the young.

The introduction of my readings at entertainments and club receptions has been received by many as a most unique and interesting feature of the evening's enjoyment.

For such occasions I shall be pleased to make appointments.

Respectfully,

H. JEROME FOSSELLI.
