THE CAWSTON OSTRICH FARM

"One of the strangest sights in America."
---N. Y. Journal.

There is no more interesting point in Southern California than this, the original and largest Ostrich Farm in America. The birds are magnificent creatures, far above the average in size and strength, and their product of feathers are proportionately superior--strong in texture, brilliant and full of life and durability. We manufacture our goods on the farm and sell direct to our patrons, who thus save both import duty and middlemen's profits.

Send for our handsome new catalogue, which is an interesting history of ostrich farming in America, and contains besides illustrations and prices of our ostrich feather goods. Free on request.

CAWSTON OSTRICH FARM
P. O. Box 83 SOUTH PASADENA, CAL.
