

# HOWE'S DOUBLE-THREAD LOCK-STITCH SEWING MACHINES,

From which all others (having any utility) derive their vitality. Invented in 1848, improved from time to time and fully perfected in 1862.

On the Howe Machines coarser thread may be used on the under spool than that used above, thereby giving greater strength of seam than can be made on other first class kinds, making the stitch alike on both sides of the fabric. They stand pre-eminently above all others, both for FAMILY and Manufacturing purposes.

Price of the Letter A, Family, with Rolling Presser, Adjustable Hemmer, Braider, Binder, and the ordinary Fixtures, \$60—formerly sold at \$80. Letter A Pearl Finish and Capped, \$75, formerly \$100; Letter B, Manufacturing, \$75, formerly \$100. Letter C, heavy Manufacturing, THE UNRIVALED OF THIS AGE, for Harness Making, Upholstery, Carriage Trimming, Boot and Shoe Work, Heavy Clothing, \$85, formerly \$115. Letter D, Cylinder (more especially for Boot Work) \$115, formerly \$150. Letter E, Large Cylinder, \$140, formerly \$175.

The B and C Machines will not only sew from Medium to heavy Leather and Cloth—their specialty—but execute beautifully and thoroughly, to an astonishing degree, in every grade of Sewing down to the finest gauze, and are being sold twenty-five dollars cheaper than those of other manufactures of same cost and less capacity.
