Population, 1861.*

Believing that the National Census of the City and County of San Francisco, completed during the year 1860, did not truly represent the number of our population, and at the urgent solicitation of numerous patrons of this work, the following exhibit has been carefully prepared from the returns of the different canvassers engaged in collecting information for the present volume. The plan adopted to obtain the necessary data, was the same as that so successfully carried into effect in the months of April and May, 1859, the results of which were published in the San Francisco Directory of that year, as follows: "To arrange and classify each sex in three divisions, viz: *MALES: First Class*—the head of each family, and members thereof over twenty-one years of age; *Second Class*—those between five and twenty-one; *Third Class*—those under five years of age. *FEMALES: First Class*—those over eighteen years of age; *Second Class*—those between five and eighteen; *Third Class*—those under five years of age. Also to collect such other information as would furnish an approximation of the different elements composing our population not included in the foregoing classifications: "
