

C. H. HARRISON,
PHOENIX OIL WORKS

[ESTABLISHED 1850,]

517 FRONT STREET, BETWEEN WASHINGTON AND JACKSON,

Manufacturer, Importer of, and Dealer in

SPERM, LARD, POLAR, KEROSENE, AND OTHER OILS.

Also, Office of Benicia and Mare Island Pilot.

HARRISON'S ECCENTRIC PUMP.

This Pump is designed for throwing large quantities of water, either as a wrecking pump, a mining pump, or for irrigation. Its principal advantages are that it is light and compact, very durable, and not at all liable to choke or get out of order. It has no valves and no packing. It is a suction and force pump, and has sucked the water up over 27½ feet.

It can be run fast or slow, and according to its speed is the quantity of water discharged. All sizes, capable of throwing from 100 to 5,000 gallons per minute, for sale by
