AGENCY, 573 Mission Street, bet. 1st and 2nd.

DUTCH FLAT, CAL.

## STRINGER & CO'S

Anti-Attrition Carbureted

# AXLE GREASE.

To Teamsters, Millmen, Engineers, and Consumers of Axle Grease generally, their attention is invited to some of the principal features of our "Carbureted Axle Grease."

FIRST.—An entire freedom from all Gum and Viscid matter, retaining its soft, oily condition to the last, and not so drying as the ordinary kinds in general use, and thereby a great saving of motive power by reducing friction to the lowest minimum point.

SECOND.—The great Cooling qualities it possesses when applied to Axles or Journals that have become heated from neglect or the use of inferior materials, will in a comparatively short time remove atmospheric changes, heat or cold having no perceptible effect upon it.

THIRD.—This Grease not absorbing that acidifying element, Oxygen, from the atmosphere, a less quantity by one-half is needed, to what is usually put on, and more is only an injury.

**No. 70 OREGON STREET,**

Two doors east of Davis, between Washington and Jackson Streets,

**SAN FRANCISCO.**
