Colleges and Private Schools.

Notwithstanding the excellence of the free public schools of the city and State, their exemption from direct cost to the pupil or parent, and the great interest taken in them by the public as the nurse and strength of our free institutions, colleges and private schools of great wealth, popularity and importance rise and prosper. That such institutions exist, show the great interest taken in educational matters. The public and private systems are rivals, each stimulating the other, and setting examples of enterprise, management, salaries, edifices, progress and standard of scholarships. There are in San Francisco about one hundred private schools, in which term are included the select school of a few pupils, the seminaries, commercial schools, academies, convent schools, and colleges, with their thousand students. The Census Marshal reported the number of youth attending private and church schools in this city in June, 1884 (not including Chinese) at 7,780. Many of the private schools having edifices of great capacity, cost and grand architectural appearance.

The object of this institution is to give a thoroughly Christian and secular education, embracing the classical, scientific and commercial courses.

Later on a wing within the enclosure was built, to afford more ample facilities for the improvement of pupils in music, needlework, painting, drawing, etc. The institution contains 600 pupils, and is under the charge of Mother Mary Ignatius McDermot.

ST.
