Sole manufacturers of H. C. Robb's Patent Gang Edger, Lever Set Head Blocks and Sawmill Machinery of all descriptions. Shafting Hangers, Pulleys, Etc. Estimates Free.

SAN FRANCISCO, CAL., April 27, 1889.

MR. H. C. ROBB, Dear Sir:—In response to your inquiry in regard to the 72-inch Gang Edger in our Mill at Hadlock, Washington Territory, we take pleasure in informing you that the same has given us entire satisfaction—not only on account of its cutting register (up to 12x12) but also from its capacity, having run through this machine over 100,000 feet per day of Oregon Pine Lumber, we are willing to vouch for its efficiency. Furthermore, it has edged the lumber for the entire mill. The machine has been in operation for about two years and has given us little or no trouble, always giving as a result true and even lumber. In conclusion we would say that for ease of working, quickness of setting the saws and for firmness for holding the same, we do not think it has an equal.

Very truly yours,  
WASHINGTON MILL CO.
