MOST ANY TIME IS A GOOD TIME to test our facilities. Give us your business for a month. You will find the perfection and the attention to command the best there is—far better than most. Quality of goods must be considered with the price. We sometimes find prices quoted against us, but, when we send and get samples of the goods, we always find them off in quality, and very often find them to be goods we have rejected or refused to handle on account of their inferiority, or unworthiness for some other reason. We must be able to stand by what we sell, not only in our store but after our customer gets it.
