OFFICIAL LIST STREET CAR ROUTES

CONTAINING ALL THE STREET RAILWAYS OF SAN FRANCISCO, GIVING THE ROUTES, POINTS OF TRANSFER AND THE FIRST AND LAST CARS LEAVING THE INNER AND OUTER TERMINALS

It is generally conceded that the street car system of San Francisco is the best conducted and has the most liberal policy of communication and travel by transfers of any city in the United States. The bulletin of transfers extends to all the various car routes, and in many instances takes in five transfers on as many separate routes without any additional cost.

It is almost beyond the memory of the average person to familiarize himself with the details of the numerous street railways. So extensive has it become, and so complicated, that the resident or visitor would be benefited by a knowledge of the adopted system of transfers.
