Western Electric Company and the Bell Telephone Laboratories' developments of the vacuum tube for telephone amplification have laid much of the foundations for radio and electronic improvements in use today.

"Looking it up in the Classified" is a national habit. Purchasing agents, production men and engineers as well as housewives refer to the Yellow Pages when they are ready to buy.

If the telephone number at your residence is listed under another's name, frequently friends do not know how to reach you. For small cost you can have a separate listing in the Telephone Directory under your own name.

Prompt answering is courteous and hospitable and helps to release the telephone equipment that much sooner. Telephone equipment throughout the nation is working to capacity these days.
