That you may be well served

It has been found that the voice carries much more clearly and satisfactorily when telephone users observe the following suggestions:

- Please speak with the lips one-half inch from the mouthpiece.
- Please speak distinctly and not too rapidly.
- Please do not shout—use the normal talking voice.
- Please be sure of the number before calling. If there is any possible doubt, it should be looked up beforehand in the telephone directory.

IN TELEPHONING, the carrying power of your voice is increased or decreased as the distance between your lips and the mouthpiece varies.

It is not necessary to shout—talk directly into the telephone with your lips just clearing the mouthpiece and in an even tone of voice to insure that your telephone conversation will be heard satisfactorily.
