

## How To Use The Telephone

### OBTAIN TELEPHONE NUMBER FROM DIRECTORY

Please obtain the desired number from the latest issue of the telephone directory. If the listing is not found call "Information."

### PRONOUNCING TELEPHONE NUMBERS AND SPEAKING OVER THE TELEPHONE

273—"Two, seven three."  
4418-J—"Four four, one eight, J."  
2100—"Two one, hundred."  
3000—"Three thousand."

Speak slowly and clearly, in an even tone of voice, directly into the transmitter with the lips just clearing the mouthpiece.

### LISTEN FOR SIGNALS

After placing a call, listen for the ringing signal, busy signal, or report from the operator.

The ringing signal is a "burring" sound heard at regular intervals and indicates that the called station is being rung. Allow the bell to ring for a reasonable period in order to give the called party sufficient time in which to answer.

The busy signal is a steady "buzz-buzz-buzz" sound indicating the called line is in use.

Some central offices are not equipped for giving these signals, but in such cases the operator will give a report if the called line does not answer within a reasonable time, or if the called line is busy.

### TO RECALL THE OPERATOR

After placing a call with an operator, if you wish to recall the operator on the existing connection, move the receiver hook slowly up and down until the operator answers; do not move the hook rapidly as this may result in the operator not receiving the signal. At telephones where the operator is signaled by turning a crank, the operator may be recalled by replacing the receiver and turning the crank again.

### CALLING FROM A COIN BOX TELEPHONE

A charge will not be made on calls which are not completed. Between successive calls, the receiver should be replaced for at least five seconds.

Any service difficulty or coin collection error should be reported promptly to the operator.

## How to Place Calls to an Enterprise Number

### FROM NON-DIAL TELEPHONES:

Call the Operator as you would for any other local number and ask for "ENTERPRISE (number)."

### FROM DIAL TELEPHONES:

Dial "Operator" and ask for "ENTERPRISE (number)."

## Method of Dialing

### DIALING A LOCAL CALL

Dial the figures of the desired number in their order from left to right.

For example, to call 2071:

1. Lift the receiver and listen for dial tone (a steady humming sound). Do not begin to dial until you hear the dial tone.
2. Keeping the receiver off the switchhook, place your finger in the opening where the figure "2" appears.
3. Turn the dial until your finger strikes the stop; then release and without forcing or retarding the return motion, allow the dial to return to normal.
4. Do the same with the figures "0-7-1," in that order.

### FURTHER DETAILS TO OBSERVE ABOUT DIALING

If, while dialing, you realize that a mistake has been made, immediately replace the receiver and after waiting a few seconds, lift the receiver and when you hear the dial tone try the call again.

Always replace the receiver for a few seconds between calls.

Do not turn the dial while talking as it may break the connection.

Do not attempt to dial out of town telephone numbers. Please refer to page V of this directory regarding the placing of Inter-City calls.

### TO CALL ANOTHER TELEPHONE ON YOUR PARTY LINE

Davis: In most cases to call another party on the same line dial the code "9," followed by the last digit of your number and then the last digit of the called number. After dialing, replace the receiver. Your telephone bell will ring at regular intervals. When ringing ceases, lift the receiver and begin conversation. If no answer is received after a reasonable period, lift the receiver and then replace it to stop the ringing.

### HOW TO MAKE AN EMERGENCY CALL IN THE DARK

Lift the receiver, listen for the dial tone, and then place your finger in the first dial opening below the finger stop. Dial this figure (zero) to reach an operator. When the operator answers, explain the situation, giving her your number and the details of your call and she will attempt to assist you.

## Inter-City Calls

Station-to-Station calls to certain points, the names of which are preceded by a star (\*) in the list of rates on pages VI, VII and VIII, will be accepted by your local operator when placed by number. If you do not know the telephone number, consult the directory or call "Information" to obtain the number.

All Person-to-Person calls and Station-to-Station calls other than as referred to above should be placed by calling long distance or dialing "Operator" as presented below.

**Station-to-Station Calls**—At the Station-to-Station rate when the initial period rate is 25c or more, provided anyone answering at the called station accepts the charge. When the initial period rate is 20c, a special collect rate of 25c applies. If the initial period rate is less

### CONFERENCE TELEPHONE CALLS

A conference telephone call is one that enables from three to six people in different cities to carry on a joint conversation. You need no special equipment.
