BUSINESS TRANSACTIONS WITH THE COMPANY

Business transactions are handled at the Business Office. The addresses and telephone numbers of our principal offices are listed in telephone directories under the Company's name.

The directions given on the first page of the Introductory Section for reporting service difficulties and obtaining assistance will care for most cases. The Business Office will be glad to answer any questions you may have about your service.

There is no charge for calls to your local Business Office or for "Information", "Repair Service", "Supervisor" or "Operator".

BILLS AND PAYMENTS

Bills for service are usually issued monthly in groups on various dates throughout the month and are due and payable upon presentation.

When paying in person at the Business Office, it will save your time if you have your bill with you. When paying by mail, please enclose the bill stub with your check. If you should desire any additional assistance or explanation regarding your bill, the Business Office will be glad to help you.

TELEGRAMS BY TELEPHONE

To facilitate sending telegrams, cablegrams, or radiograms, please call or dial telegraph companies as listed in this directory. Charges for telegraph messages of The Pacific Telephone and Telegraph Company at all exchanges and for telegraph messages of the Western Union Telegraph Company at certain exchanges, placed by telephone, will be billed by the Telephone Company on its bill for service, or if sent from a coin telephone, the charges will be collected at the time the message is sent.

RATES

Rates and practices included in this directory are based upon those in effect at the time this directory was closed for printing and are subject to such changes as may be made from time to time.

Copies of our rules and regulations and schedules of rates are available for public inspection at locations designated on notices posted in our Business Offices.

IDENTIFICATION OF EMPLOYEES

Employees of the Company are supplied with identification cards. If you have any doubt as to the right of a person to represent himself as an employee of this Company, or if any unauthorized person requests access to, or tampers with telephones or other equipment, please call the Business Office.

ATTACHMENTS TO TELEPHONES

In the interest of good service, please do not use any devices on telephone equipment except those furnished by the Company. The devices claimed by agents to eliminate noise, to destroy germs, etc., are usually detrimental and interfere with good service.

HELPFUL SUGGESTIONS

PLEASE BE SURE OF THE NUMBER

You can obtain the desired number from the latest issue of the telephone directory. If the listing is not found please call "INFORMATION".

TONES AND SIGNALS

DIAL TONE—A continuous hum, indicating that equipment is ready to receive your call.

RINGING SIGNAL—A "burring" sound repeated at regular intervals, indicating the called telephone is ringing.

BUSY SIGNAL—A steady "buzz-buzz-buzz" sound, indicating the line is in use.

DIAL AGAIN SIGNAL—A continuous hum alternately rising and falling in pitch indicating some mistake has occurred on the call.

PLEASE LISTEN FOR SIGNALS

After placing a call, you will hear the ringing signal, busy signal or the report from your operator. Allow the called line to be rung for a long enough time so that the called party will have time to answer.

When you hear the busy signal, please replace the receiver and try the call again later.

For central offices not equipped for giving signals, the operator will give a report if the called line does not answer within a reasonable time, or if the called line is busy.

SPEAKING OVER THE TELEPHONE

Please speak slowly and clearly, in an even tone of voice, directly into the transmitter, with the lips just clearing the mouthpiece.

ANSWERING CALLS

Please answer promptly. You will save time when answering if you give your own number or name.

CALLING FROM A COIN TELEPHONE

Instructions are posted on or near each coin telephone to tell you how to place calls. A charge will not be made on calls which are not completed. Between successive calls, replace the receiver for at least five seconds. Please report at once any service difficulties or coin collection error to the Operator.

IT'S EASY TO USE YOUR DIAL TELEPHONE

TO DIAL A LOCAL NUMBER

Dial the figures of the desired number in their order from left to right:

For example, to call 2-0951:

1. Lift the receiver and listen for the dial tone (a steady humming sound).
2. Keeping the receiver off the hook, place your finger in the opening where the figure "2" appears.
3. Turn the dial until your finger strikes the stop, then release and without forcing or retarding the return motion, allow the dial to return to normal.
4. Do the same with the figures "0-9-5-1" in that order.

PLEASE OBSERVE THESE DIALING SUGGESTIONS

If, during or at the end of dialing, a continuous hum, alternately rising and falling in pitch, is heard it indicates that some mistake has occurred on the call. Replace your receiver, verify the called number with the latest directory, and then dial again.

In case you have repeated trouble dialing a number, replace the receiver for a few seconds, then dial the opening where the word "Operator" appears and she will assist you.

Always replace the receiver for a few seconds between calls.

Please do not turn the dial while talking as it may break the connection.

If, while dialing, another party has come on the line, replace the receiver for a moment and dial the number again; otherwise a wrong number may result.

If, before you start to dial, you hear the dialing of another party, announce the interruption, replace the receiver and make your call later.

TO CALL ANOTHER TELEPHONE ON YOUR PARTY LINE

To ascertain the telephone number of another party on your line call or dial Repair Service.

DAVIS: To call another party on the same line dial "29", followed by the last digit of your number and then the last digit of the called number. After dialing replace the receiver. Your telephone bell will ring at regular intervals. When ringing ceases, lift the receiver and begin conversation. If no answer is received after a reasonable period stop the ringing by lifting the receiver momentarily.

SACRAMENTO: Two and Four Party Lines. To call another party on the same line it is necessary to dial a special code number which may be obtained from the operator. After dialing the code number, replace your receiver. Your telephone bell will ring at regular intervals. When ringing ceases, lift the receiver and begin conversation. If no answer is received after a reasonable period, stop the ringing by lifting the receiver momentarily.

Ten Party Lines: To call another party on the same ten party line, dial the listed number. When dialing is completed, the busy signal will be heard. Replace the receiver. Your telephone bell will ring at regular intervals. When ringing ceases, lift the receiver and begin conversation. If no answer is received after a reasonable period, stop the ringing by lifting the receiver momentarily.

TO MAKE AN EMERGENCY CALL IN THE DARK

Lift the receiver, listen for the dial tone and then place your finger in the first opening below the finger stop. Dial the figure "0" (zero) to reach an Operator. When the Operator answers explain the situation, and she will be glad to assist you.
