DO YOU WAIT FOR THE DIAL TONE

BEFORE YOU START TO DIAL?

The humming Dial Tone is your signal that the telephone equipment at the Central Office is ready to receive your call.

Sometimes in these war-busy days you may pick up the telephone to dial a number and not hear that familiar hum immediately. This probably means you have called when there is no room for your call on the central office equipment just at that moment.

By waiting before starting to dial—until you hear the Dial Tone—you avoid having to start all over.

Everybody's co-operation will enable us to handle thousands more calls every day.
