The Electrical Gun Director was developed  
by Bell Telephone Laboratories and  
made by Western Electric Company during  
World War II. Employing more than  
100 vacuum tubes, it solves in 15 seconds  
mathematical equations that would take a  
trained mathematician more than 5 hours  
to do.

A thoughtful party-line user answers  
her telephone bell promptly . . . places  
her own calls accurately, so that they do  
not have to be placed again . . . does  
not monopolize the telephone at the  
inconvenience of others . . . teaches  
children, too, the little telephone kind-  
nesses . . . and when her telephone is not  
in use, sees that it is hung up.
