

To a nearby city, or across the nation, your Long Distance Call goes through in seconds when you dial it yourself. And Direct Distance Dialing is easy and fun, too! No wonder more and more folks are taking advantage of DDD—the modern efficient way to place Long Distance calls.

Solution: A second telephone line to your home or office. For information, just call your telephone Business Office.

Make sure that the telephone figures in your plans.

Building or remodeling? Include concealed telephone wiring in your plans. Telephones can then be added later, at a number of locations without the wires showing. For information, just call Telephone Planning Service. No charge, of course.
