"Blank & Company's line is busy."

"Well, get the Smith & Jones; I'll give them the order."

A Concern Without Adequate Telephone Facilities Loses Business

WHEN all your telephone lines are in use, your telephone doors are closed. Customers who try to reach you by telephone cannot do so. If they frequently find your telephone lines busy, they will become exasperated and send their orders to another concern—one that has adequate telephone facilities and an open telephone door.

Telephone buying is on the increase. It has already become a habit with many thousands of people. A concern desiring telephone trade can no more afford to have inadequate telephone facilities than it could afford to have so few entrances that prospective customers could not walk into the store without waiting in line.

It is not difficult or expensive to correct busy telephone conditions. An additional central office line, or an additional telephone installed in a growing department, is frequently all that is needed.

Are Your Telephone Facilities Adequate?

If you are in doubt about it notify us, and we will make an investigation to determine what changes, if any, are needed. No obligation is incurred by asking for such investigation. Telephone nearest Sales Office and a representative will call.

The Pacific Telephone and Telegraph Company
