

## A personal service to our customers

*We desire to install or move your  
telephone just when you want it*

EVERY man and woman in the telephone organization wants you to feel that your interests are his interests,—that your service is his personal consideration.

For example, when you would like to have your telephone installed or moved at a specific time.

Unless an exceptional problem is in-

involved, we can do this work in accord with your wishes. So, if you can tell us when you will move into the new home or the new business quarters, we will have your telephone ready and waiting.

Just say to our business office, "I would like to have my telephone installed by such-and-such a day."

The men who make installations are gentlemen. They try very earnestly to make as little upset as possible,—even spreading paper on the floor where tools are being used.

You can count on our whole-hearted co-operation.

We are very glad to remedy telephone troubles when they occur, and appreciate your co-operation in holding them to the least number possible. A desk telephone, for instance, can be knocked to the floor. It contains 201 separate parts, some quite delicate. Please protect your telephone and cord, in order that it may give you the best of service!
