Hearing Aids
Alexander Graham Bell
inventor of the telephone

The Hearing Aid And The Telephone
find a common association, not only because both were major interests in Bell's life, but also because both are essentially alike in principle.
Thus, it is eminently fitting that Western Electric, makers of Bell Telephones since 1882, should apply the knowledge gained in telephone research to the remarkably helpful Western Electric hearing aids of today.
Meeting the needs of the hard-of-hearing has long been a Western Electric tradition—one which it will continue to maintain in the future.
The latest Western Electric Hearing Aid, the Ortho-tronic Audiphone, embodies the revolutionary Stabilized Feedback Circuit, permitting greater amplification without distortion—giving living, vibrant sound. Tone Discriminator helps clarify speech in noisy places. Overload Limitation prevents blast from loud sounds.
You are invited to call for a free demonstration—Hearing is Believing.
