You'll get quicker service when you dial if you follow these simple steps:

1. Listen for the dial tone. This tone is your signal that the equipment is ready to take your call.
2. Dial each letter and digit of the number in its right order.
3. Draw the dial all the way to the finger stop.
4. Remove your finger and let the dial return naturally, without forcing or hurrying.
5. If you make a mistake while dialing, hang up for a few seconds and then start your call again.

To speed service please look up the number first!

Each new issue of the Telephone Directory contains an important percentage of listings that are new or changed.

Many new telephones have been installed.

Many people have changed their places of residence or business.

Please consult the directory first

Please—
DON'T "HANG UP" TOO SOON

Sometimes people place telephone calls and do not give the called person sufficient time to answer.

Wait a few seconds longer — perhaps the person you are calling is almost there!
