A store may not immediately
come to the mind of a prospect
when special services are desired,
such as are offered by a Beauty
Salon, Radio or Watch Repairing
Department. Many establishments,
realizing this, advertise under sev-
eral classifications in the Classified
Directory. Thus they direct more
business their way.

You'll get quicker service when
you dial if you follow these simple
steps:

1. Listen for the dial tone. This tone is your signal that the equipment is ready to take your call.
2. Dial each letter and digit of the number in its right order.
3. Draw the dial all the way to the finger stop.
4. Remove your finger and let the dial return naturally, without forcing or hurrying.
5. If you make a mistake while dialing, hang up for a few seconds and then start your call again.
