A store may not immediately come to the mind of a prospect when special services are desired, such as are offered by a Beauty Salon, Radio or Watch Repairing Department. Many establishments, realizing this, advertise under several classifications in the Classified Directory. Thus they direct more business their way.

Radar ranks high in the top bracket of new instruments that brought victory to the Allies. It was developed through years of research and experiment, chiefly in the United States and Great Britain. Scientists of Bell Telephone Laboratories and workers of Western Electric Company developed and supplied our Government with more radar equipment than any other supplier.
