More and more, business men are finding that it pays in good will to place and receive their telephone calls with as little time-lag for the other fellow as possible. They place their own calls or stay close to the telephone when they tell someone else to do it.

When you take down your telephone to dial, a few seconds are sometimes required for the equipment at the central office to get ready to serve you. When it is in position you hear a notifying hum, a "dial tone", corresponding to an operator's "Number, please?" If you will wait for this dial tone, it will speed your calls
