Listen for the dial tone—dial carefully—draw the dial all the way, lift your finger and let the dial go back to position naturally, without forcing. These simple steps enable you to dial telephone numbers speedily and with precision.

FRONTIERS beyond

There are always new frontiers to telephone service, problems to be solved, improvements to be made, and there will always be Telephone Pioneers pushing on to new achievements.

THE PACIFIC TELEPHONE AND TELEGRAPH COMPANY

When you take down your telephone to dial, a few seconds are sometimes required for the equipment at the central office to get ready to serve you. When it is in position you hear a notifying hum, a "dial tone," corresponding to an operator's "Number, please?" If you will wait for this dial tone, it will speed your calls!

When you call somebody by telephone **PLEASE DON'T "HANG UP" TOO SOON**

"Play Ball" with him by giving him time to answer.
